Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . breeding in the nuts. Thus, Brooks, writing in 1910, describes and illustrates the injury to the nuts by the adults and larvae of this insect. Dr. F. H. Chittenden, of the Bureau of Entomology, in a letter to the senior author, as late as June 1911, states: This species has never been given careful study to my knowledge, and I have never had an opportunity of testing any remedy against it. I am familiar with its habits, however, having studied it when at Ithaca, LeConte, Proc. Am. Phil. Society, Vol. XV, p. 226, 1876. t Brooks, West Virginia Agricultural Experiment Station, Bull. 128, p. 176, 1910. THE WALNUT WEEVIL OR CURCULIO. 243 N. Y., and found that the larva develops chiefly from the nuts of the walnut. The first intimation that the insect breeds also in walnut stems came to us from Dr....
